

ALLIANCE Multi-Operator DAS Multi-Power Remote Optic Unit (MPROU) Product Specifications / Parts List

The ALLIANCE Release 6 platform is SOLiD's multi-operator, neutral host Distributed Antenna System (DAS) that efficiently delivers wireless RF signals into any indoor or outdoor location difficult to cover with traditional macro networks.

The Multi-Power Remote Optic Unit (MPROU) can support up to seven commercial bands, each delivering 5W or 20W of output power.

The MPROU features:

- Multi-band combiner provides one antenna port
- Easy install, commissioning and management
- External fan cooled
- Rugged construction: UL Type 4X certified
- Up to 7 bands in one cabinet and on one fiber

Overview

The SOLiD ALLIANCE Multi-Power Remote Optic Unit (MPROU) provides a single chassis solution that supports all commercial cellular bands from 600 to 2700 MHz with output power levels optimized for bandwidth and frequency. The MPROU shares the same headend as all other ALLIANCE remotes, including edgeROU, N2ROU, MROU, and HROU.

The MPROU enclosure incorporates a rugged, but compact UL Type 4X design. Units can be wall mounted, indoors or outdoors. An external alarm port on the bottom of the enclosure can accept input alarms from connected equipment like battery backup systems.

A multi-band combiner unit supports single antenna configurations. A dual fan unit is included to dissipate heat when mounted horizontally or vertically.

Unit Name	Unit Description
Multi-Power Remote Optic Unit (MPROU)	Enclosure including R-CPU, R-PSU_AC or DC, Multiplexer, R-Optic, Dual Fan
Remote Power Supply Unit (PSU)	AC: 90-240 VAC. DC: -40.8 to -57.6 VDC. Output power +29 VDC
Remote Central Processor Unit (CPU)	Controls and monitors signals for each unit
Remote Drive Units (MRDU/HRDU)	Filters and amplifies downlink / uplink signals (up to six)
Remote Optic Module (R-Optic)	Converts downlink optical signals to RF and uplink RF signals to optical
Combiner (CU)	Combines downlink signals and separates uplink signals for each band
External Alarm & Fan Interface Unit	Provides port for connecting external alarms and power port for external fan unit. Fans turn on/off automatically based on operating temperature.
